Image resolution	150 ppi
Total ink coverage	240%
Maximum black	95%
Dot gain	26%

www.mortonsprint.com

Single page PDF

285mm x 360mm
Document size

The grey area is the non-print area and is a 10mm margin that should consist only of white space.

The black area is the critical image area. Text or images including folios should not exist outside this area.

Centre spread PDF

570mm x 360mm
Document size

The centre spread can have text and images that run across the gutter. The grey and black areas are exactly as explained above.

Spread PDFs

INCORRECT

If you have a spread over two pages other than a centre spread the pages must still be sent as single PDFs. In this instance images can go over the gutter. Please make sure that headline text is spaced either side of the exact centre to avoid any letters being split as this will not join up exactly when printed.

CORRECT

Please Note!

The PDF size should not be confused with the finished newspaper size found on your quote form.

Type & rule guidance

Coloured type

Below are the ideal minimum point sizes for when producing type out of more than one of the four process colours:

	Sans Serif	Serif	Fine Serif
2,3 and 4 coloured type	12pt	12pt	14pt

Reversed & coloured type on coloured backgrounds

Below are the ideal minimum point sizes for when producing type out of more than one of the four process colours:

	Point size
1 coloured background	10pt
2,3 and 4 coloured background	12pt

Examples

Arial
10pt text

1 coloured background
M 100%

Arial
12pt text

2 coloured background
M 100% Y 100%

Arial
12pt text

4 coloured background
C 100% M 30% Y 100% K 15%

Design guidance

10pt text

Type should not be reversed on a yellow background

10pt text

Type should not be reversed on light coloured backgrounds
C 10% Y 10%

Rules

Below are the ideal minimum point sizes for when producing rules out of more than one colour.

	Rules
1 col	.5pt
2 col	3pt
3 and 4 col	4pt

Registration issues

It's very difficult to get four separately printed colours to line up exactly on a newspaper press. The smaller the text or rule the harder it is to print clearly without any ghosting appearing so please take in to account the information given on this page. See the example below of how things can sometimes appear when the information on this page is not taken in to account.

Example
